RECYCLE WITH US

Our thinking:

This project was realized by me and my classmates in order to help the underprivileged people.

Therefore we decided to create a website (www.riciclaconnoi.it) and to spread it on several social networks.

Our initiative is to collect as much food as possible that would otherwise be thrown away by families, supermarkets, restaurants etc.

After collecting the food, we will deliver it to an association that will then distribute it to the less fortunate, while respecting the hygiene obligations.

the project:

The purpose of our project is to bring the food we have previously provided to soup kitchens, satiating the hungry and avoiding food waste

The Target

We will use trucks to collect excess food in supermarkets from families and from those who want to support us.

Then we will deliver it to soup kitchens and non-profit associations.
